INNOVATION

# SAY GOODBYE TO DAMAGING REMOVAL

# SAY HELLO TO EASY ON, EASY OFF

**Removal that is as satisfying as application!**  
No drilling or filing is necessary, and you can forget acetone-soaked cotton balls and fingers clumsily wrapped in foil. Shellac Remover Wraps are designed to provide gentle, efficient removal of the Shellac UV Color Coat. The plastic-backed, self-adhering cotton wraps limit finger and skin exposure to acetone by keeping it pinpointed to just the nail. Retaining body heat speeds the process and ensures thorough product removal in only ten minutes.

**SHELLAC REMOVER WRAPS**  
10 pack ssp. \$3.95  
100 pack ssp. \$34.95

STEP-BY-STEP

# SHELLAC MANICURE

-  **STEP 1** Meticulously prep the natural nail plate using Cuticle Away and ScrubFresh.
-  **STEP 2** Apply one thin layer of Shellac UV Base Coat to each nail surface and extension edge of all five nails on one hand. Cure all five fingers together for ten seconds in the new CND UV Lamp. Repeat on other hand.
-  **STEP 3** Apply one very thin coat of your chosen Shellac UV Color Coat to each nail surface and extension edge of all five nails on one hand. Cure for two minutes in the new CND UV Lamp. Repeat on other hand.
-  **STEP 4** Repeat Step 3 to both hands.
-  **STEP 5** Apply a luxurious layer of Shellac UV Top Coat to each nail surface and extension edge of all five nails on one hand. Cure for two minutes in the CND UV Lamp. Repeat on other hand.
-  **STEP 6** Remove the top film (sticky inhibition layer) with a plastic-backed, lint-free pad soaked with 99% IPA (Isopropyl Alcohol). Condition nail and surrounding soft tissue with SolarOil.

\*If using an original CND Brisa lamp, apply and cure four fingers on each hand and then the thumbs separately.
